

Motorized Linear Actuator Compatibility Guide

'Yellow' requires some customization for compatibility and may include significant performance limitations in terms of travel length, load capacity, etc. A minimum order quantity is required for these versions.

As a guidance, please consider a MOQ (Minimum Order Quantity) of 10 units (stage & actuator) for a one axis system and a MOQ of 5 units for a two or three axis system. The exact minimum order quantity for your specific customization will be confirmed when requested.
